

## Electronic Door Locks - Commercial Grade CL5000

Codelocks 5000 Commercial Grade Keypad Locks (Available with Keypads on Both Sides)

Model: CL5000

Codelocks Lock--A simple and cost effective access solution. Replace your regular door lock with a Codelocks lock electronic digital door lock for your office or warehouse. Codelocks lock is designed and engineered in the UK. The Piezo actuator, used for the first time in a stand alone electronic lock provides a battery life of over 500,000 operations (approximately ten times more than a typical electronic push button lock).

The CodeLocks lock is a very heavy duty electronic pushbutton lock with lever handles. The codelocks lock is to be used for office in high traffic situations. The lever handles allow it to be used as the primary lock on most doors, while various functions provide for control of the door in a variety of ways.

Codelocks 5000 electronic complete with latchbolt. Supplied with all fixings, templates and instructions to give convenient flexible access control. This lockset also come with keypads on both sides which is keyless door locks design for alzheimer's disease to protect them from access to outside and wonder around. The codelocks lock is also safety and public safety compliant and ADA (American Disability Act) compliant.
