

## Commerical Grade Remote Deadbolt & Levers Lock ERM-043

A simple and cost effective access solution. Replace your regular door lock with an electronic remote control door lock for your office or warehouse. This Interconnected lever entry lock includes an integrated deadbolt system. But it's more than just a deadbolt, the locks combine digital convenience with an intelligent burglar alarm to enhance the security and safety of any home, office, or warehouse.

The interconnected keyless lock provides great convenience and cost-savings for apartment building owners, student dormitories, time shares, office buildings, and other buildings or residences with high tenant turnover. Interconnected keyless lock can be quickly and easily re-programmed with new access codes, as often as required, eliminating the need to re-key a lock with each change of tenants. The door lock comes with 2 remote controls, additional locks can be ordered. Security:

- Activated by Infrared Remote Controller
- Easy to program
- Functions with up to 20 controllers
- Compatible with optional RF-70 auto-dialing Modem
- Blocks out after three incorrect entries; alerts user of unauthorized incorrect entries when correct code is entered.
- Easy to program to add or delete codes.
- Incorrect Code Warning Alarm - if incorrect code is entered three times alarm is activated.
- Flashing red light indicates entry has been attempted with an incorrect code.
- Remote control can only work facing outside lock within 15 feet range. Line-of-sight is required.

Convenience:

- Passage or Store Room Functions are available
- Easy to operate; just lift the lever handle to lock and press down to unlock
- Codes can be set/deleted in less than 15 seconds

#### Terms

- Adaptor Face Plate (1" wide x 9-3/8" long) can be purchased to cover old holes (See diagram), but if the slot is wider than 1", then it can not be used.
- Push Plate (3-1/2" Wide x 15" Long) can be purchased to cover existing front and back holes. (See Diagram)
- Passage Function : Outside knob/lever always open. This function is used for doors where no locking is required. The knobs or levers freely operate the latch. Passage sets are commonly used on interior doors, and sometimes on an exterior door in conjunction with a separate deadbolt.
- Storeroom Function : Outside knob/lever always locked. Unlocked by key or on board keypad only. Inside knob/lever always free to turn and open or unlock.
