

PNT2000 Radio Frequency Deadbolt

The PNT 2000 NO TOUCH provides freedom and independence for those less mobile, and convenience when hands are full. The PNT2000 No Touch allows the unlocking, opening then closing and locking of your door using a remote control.

Remote: With a press of the unlock button on your remote control it will unlock the deadbolt then open the door. If using the automatic close, a time delay will allow entering or exiting before the automatic close and lock cycle initiates. Once opened, the door will automatically close then lock. If you turn the on/off switch to the garage type you press the door to unlock and open, then press again to close and lock. Now you can answer the door from virtually any room in your apartment. The remote can be used from the inside or outside of the door. A pleasant audible tone will tell you if the system is in operation. The lock button will not operate the system.

Door Opener and Closer: The PNT2000 plugs into any electrical wall receptacle. You can enter and exit manually with a key and hand opening or closing. If the PNT2000 is not needed it can be shut off simply by moving the switch on the bottom of the unit to the off position.

Security: The PNT2000 is designed to close and lock using a deadbolt every time the door is opened. All the user has to do is press the remote, and then watch the door goes through its cycle and lock.

Key Benefits:

Ideal for those who are in scooters, wheelchairs or walkers as it allows them to enter and exit the door by just touching a button. Allows answering of the door from the comfort of your couch or bed. Improves the image of the home and provides a sense of modernization and practical convenience. Eliminates damage to the walls and doors. Personal assistance is no longer needed to enter or exit doors. Easily transferable to another door if no longer required. Affordable and easy to install

Key Features: Safety:

If the Phantom No Touch meets any resistance during the open/closed cycle, the motor will immediately disengage preventing any harm to the person entering or exiting. **Product Life:** Factory tests show that the Phantom No Touch will last over 25,000 cycles. **Microprocessor:** The Phantom No Touch is programmed so the units timing and speed is safe and operate efficiently. Timing control slows the motor just prior to closing and opening to facilitate a smooth operation.

Colors: The PNT2000 is available in white, bronze and satin finishes. **Deadbolt:** The deadbolt uses Radio Frequency and included these key features: Anti-Scan code hopping technology. Lock and unlock the door from any directions within the RF range (up to 30 ft if there is no obstacle between remote and lock). Single push button programming. Adjustable latch: 2 3/8" or 2 3/4" backset. Use 4 AA batteries (not included), low battery consumption. Audible tones for lock, unlock, jam and low batteries. 1 remote transmitters and additional keys for conventional operation included. Video Price: \$1080.00 USD
